## Captura de la salida en consola

The screenshot shows a Visual Studio Code editor with a Python file named `main.py` open. The script defines a function `leer` that counts the number of digits, letters, and symbols in a given string. The console output shows the results of running the script.

```

1  import os
2  #uso de ASCII para el conteo de numeros, letras y simbolos
3  def leer(var):
4      numero = 0
5      letra = 0
6      simbolo = 0
7      for i in var:
8          if ((ord(i)>=48) and (ord(i)<=57)):
9              numero += 1
10         elif ((ord(i)>=65) and (ord(i)<=90)):
11             letra += 1
12         elif ((ord(i)>=97) and (ord(i)<=122)):
13             letra += 1
14         elif ((ord(i)>=32) and (ord(i)<=47)):
15             simbolo += 1
16         totalcarac = numero + letra + simbolo
17         var = "Total de Números: " + str(numero) + " Total de letras: " + str(letra) + " Total de símbolos: " +
18         print(var)

```

The console output shows the results of running the script:

```

Total de Números: 80 Total de letras: 85 Total de símbolos: 39 Total de caracteres: 204
